## Objective

Experienced **Frontend Developer** with a strong track record of building robust, scalable web applications using JavaScript, TypeScript, React.js, and Next.js. Skilled in performance optimization, responsive design, and creating seamless mobile user experiences. Eager to contribute to a forward-thinking team by delivering innovative, high-quality solutions and exceptional client support that drive real business value.

## Soft Skills

- ❖ Effective communication
- ❖ Teamwork
- ❖ Problem Solving
- ❖ Time Management

## Technical Skills

- ❖ JavaScript
- ❖ TypeScript
- ❖ HTML
- ❖ CSS (tailwindCss, bootStrap, mUi, semanticUi, styledComponent, antD, shadCn and radixUi)
- ❖ ReactJs (Redux Toolkit, contextApi)
- ❖ NextJs (NextAuth, Vercel Deploy, SSR, CSR, Next SEO, Zod, reactHookForm and React Query )
- ❖ JestJs (React Testing Library)
- ❖ React Native (CLI)

## EXPERIENCE

### ❖ Frontend Developer | Cloudpacer

04/2022 - Current

- I have successfully completed five major projects, including e-commerce, logistics services, an HRM system, a social app, and an eco-analyzer portal. My contributions focused on enhancing functionality and improving user experience across various modules.
- Collaborated with customers and development teams to troubleshoot issues, performing system testing and regression testing to ensure complete UI functionality after issue resolution.
- Developed dynamic front-end interfaces using **React.js**, **Next.js**, Redux, ContextApi, CSS, Bootstrap, TailwindCss, Ant Design, MUI, Semantic UI React, chakraUi, JavaScript, and TypeScript, implementing the latest ES6 features.
- I utilized **Jest** and **React Testing Library** to write unit and integration tests for React components, ensuring reliability and early detection of issues, leading to smoother and more efficient releases.
- I have integrated **Stripe** payment solutions to enhance e-commerce functionality, including managing Payment Intents, handling customer payments, and managing subscriptions.
- Built RESTful APIs and implemented OAuth authentication with **Node.js** and **Express.js**, enhancing security and user management.

- Utilized GIT for version control, regularly committing and pushing code to GitHub to maintain project integrity and collaboration.

## ★ Key Projects

- **Context Nature:** Created an MVP web portal using Next.js, optimizing automated data collection for green incentive discovery. Designed a dashboard portal for summary reports and a data collection page for machine learning analysis.
- **rFleet.ai:** Contributed to a logistics management platform built with Next.js by integrating Stripe for automated receipt generation and resolving UI bugs. Implemented webhooks to monitor payment status and manage pricing, taxes, and platform fees.
- **FanFood:** Contributed as Frontend Engineer at FanFood, transforming concessions at live events across the U.S. with mobile pickup and delivery solutions, ensuring fans stay focused on the action without missing a moment.
- **Smart Land Agri:** Crafted the frontend for SmartLand, a smart irrigation and fertigation system powered by renewable energy, designed to help farmers in Lebanon and the MENA region remotely optimize crop yields and reduce costs.
- **EMS System:** Developed a comprehensive EMS system with admin and client portals, focusing on user data management, attendance and leave tracking, and financial oversight.
- **GoodHood:** Provided frontend development support for Goodhood, enabling hassle-free auto services diagnostics, repairs, and maintenance at customers' doorsteps. The platform offers upfront quotes, certified technicians, and convenient scheduling, enhancing user experience and service accessibility.
- **MoodMe App:** Contributed to the React Native CLI-based MoodMe app, a relationship tracking application, by enhancing front-end functionality.

## ❖ Junior MERN Developer | Solstice Solutions

10/2021 - 03/2022

- Utilized **React.js** to create reusable UI components, employing **Redux**, CSS, Bootstrap, Ant Design, MUI, Semantic UI, JavaScript, and TypeScript while implementing the latest ES6 features.
- Demonstrated proficiency in leading frameworks like React.js to develop high-quality, scalable, and reusable components and front-end solutions.
- Created and deployed new features to enhance and maintain existing applications, following the **MVC** pattern using **Node.js** and **Express.js**.

## EDUCATION & CERTIFICATIONS

- ❖ Bachelor of Science in Computer Science(BSCS)  
- **Virtual University of Pakistan, Lahore**

2016 - 2020

- [Front-End Web Development with React](#) - Coursera
- [Legacy JavaScript Algorithms and Data Structures](#) - FreeCodeCamp
- [JavaScript Basics](#) - HackerRank

## Activities

- ❖ Table Tennis
- ❖ Badminton
