Objective

As a seasoned Fullstack Software Engineer with extensive industry experience in building robust web and mobile applications, I am seeking a challenging role where I can leverage my expertise in JavaScript, TypeScript, React.js, Express.js, Node.js, and MongoDB. I also have significant experience working with React Native and Next.js for several months, enhancing my versatility in developing comprehensive solutions. I am eager to apply my skills to deliver cutting-edge solutions and exceptional client support to your organization.

SOFT SKILLS

- ❖ Effective communication
- ❖ Teamwork
- ❖ Problem Solving
- ❖ Time Management

TECHNICAL SKILLS

- ❖ JavaScript
- ❖ HTML
- ❖ CSS (tailwindCss, bootstrap, mUi, semanticUi, styledComponent, antD, shadCn and radixUi)
- ❖ ReactJs (Redux Toolkit, contextApi)
- ❖ NextJs (NextAuth, Vercel Deploy, Next SEO, Zod, reactHookForm and React Query)
- ❖ JestJs (React Testing Library)
- ❖ React Native (CLI)
- ❖ ExpressJs
- ❖ NodeJs
- ❖ MongoDb
- ❖ Docker
- ❖ CI/CD
- ❖ AWS (EC2, S3 and route53)

EXPERIENCE

- ❖ **MERN Stack Engineer | Cloudpacer**   04/2022 - 01/2025

- I have successfully completed five major projects, including e-commerce, logistics services, an HRM system, a social app, and an eco-analyzer portal. My contributions focused on enhancing functionality and improving user experience across various modules.
- Collaborated with customers and development teams to troubleshoot issues, performing system testing and regression testing to ensure complete UI functionality after issue resolution.
- Developed dynamic front-end interfaces using **React.js**, **Next.js**, Redux, ContextApi, CSS, Bootstrap, TailwindCss, Ant Design, MUI, Semantic UI React, chakraUi, JavaScript, and TypeScript, implementing the latest ES6 features.
- I utilized **Jest** and **React Testing Library** to write unit and integration tests for React components,

ensuring reliability and early detection of issues, leading to smoother and more efficient releases.

- Engineered robust back-end systems using Node.js, AWS, Express.js and MongoDB ensuring efficient and scalable server-side solutions.
- Built RESTful APIs and implemented OAuth authentication with **Node.js** and **Express.js**, enhancing security and user management.
- Utilized GIT for version control, regularly committing and pushing code to GitHub to maintain project integrity and collaboration.
- I have integrated **Stripe** payment solutions to enhance e-commerce functionality, including managing Payment Intents, handling customer payments, and managing subscriptions.

★ **Key Projects**

> **rFleet.ai:** Contributed to a logistics management platform built with Next.js by integrating Stripe for automated receipt generation and resolving UI bugs. Implemented webhooks to monitor payment status and manage pricing, taxes, and platform fees.
> **EMS System:** Developed a comprehensive EMS system with admin and client portals, focusing on user data management, attendance and leave tracking, and financial oversight.
> **Context Nature:** Created an MVP web portal using Next.js, optimizing automated data collection for green incentive discovery. Designed a dashboard portal for summary reports and a data collection page for machine learning analysis.
> **Holimart:** Developed an MVP e-commerce platform featuring an optimized and user-friendly seller portal for managing product listings, alongside a buyer app that caters to various categories, including groceries and daily essentials. Integrated Stripe for seamless payment processing and billing.
> **MoodMe App:** Contributed to the React Native CLI-based MoodMe app, a relationship tracking application, by enhancing front-end functionality.

❖ **Junior MERN Developer | Solstice Solutions**   10/2021 - 03/2022

- Utilized **React.js** to create reusable UI components, employing **Redux**, CSS, Bootstrap, Ant Design, MUI, Semantic UI, JavaScript, and TypeScript while implementing the latest ES6 features.
- Demonstrated proficiency in leading frameworks like React.js to develop high-quality, scalable, and reusable components and front-end solutions.
- Created and deployed new features to enhance and maintain existing applications, following the **MVC** pattern using **Node.js** and **Express.js**.

EDUCATION

❖ Bachelor of Science in Computer Science
  Virtual University of Pakistan, Lahore.   2016 - 2020

ACTIVITIES

❖ Table Tennis
❖ Badminton
